Description and Objectives:
In the world of the Internet of Things (IoT), the rapid growth and exponential use of digital components leads to the emergence of intelligent environments namely “digital ecosystems” connected to the web and composed of multiple and independent entities. The International Conference on Management of Digital EcoSystems (MEDES) aims to develop and bring together a diverse community from academia, research laboratories and industry interested in exploring the manifold challenges and issues related to resource management of Digital Ecosystems and how current approaches and technologies can be evolved and adapted to this end.

Topics:
MEDES seeks contributions in the following areas:
- Digital Ecosystem Infrastructure
- Data & Knowledge Management
- Computational and Collective Intelligence
- Semantic Computing
- Software ecosystems for software engineering
- Big Data, Services, Trust, Security & Privacy
- Software Engineering
- Internet of Things and Intelligent Web
- Cyber Physical Systems
- Social and Collaborative Platforms
- Human-Computer Interaction
- Open Source
- Applications (Logistics, Energy, Healthcare, Environment, Smart Cities, Digital Humanities, Robotics, etc.)
- Complex Systems and Networks

Paper Submission:
Submissions must be in an electronic form as PDF format and should be uploaded using the conference website. Paper submission guidelines are available on the following link: https://medes.sigappfr.org/21/calls/call-for-papers. The conference Proceedings will be published by ACM and indexed by the ACM Digital Library and DBLP. Kindly submit your papers by clicking https://easychair.org/conferences/?conf=medes2021.

Important Dates:
Submission Deadline: July 16th, 2021
Notification of Acceptance: August 16th, 2021
Camera Ready & Paper Registration: September 5th, 2021
